

INVESTING IN TYNE & WEAR

INTRODUCING NORTHERN POWERGRID

Here at Northern Powergrid we work behind the scenes to deliver electricity to 3.9 million businesses and homes in the North East, Yorkshire and northern Lincolnshire.

Our network consists of more than 61,000 substations and around 93,000 kilometres of overhead lines and underground cables. We have more than 2,200 employees who work to keep the lights on for our 8 million customers.

Our operating zones are coordinated so we can tailor our services and our response to the needs of you and your local community. We moved from five larger zones to nine zones defined by their industrial, urban or rural landscape. This operating model demonstrates our commitment to improving service and providing locally based managers who are able to keep in touch with the local community to understand the best way we can meet your needs.

OPERATING IN TYNE & WEAR

This booklet provides you with a handy personalised directory of our services in Tyne & Wear.

We have included information about our investment schemes across the region and the full range of other services we provide.

Our services complement much of the work that local authorities and Local Enterprise Partnerships have responsibility for and we want to work closely with other local partners to help achieve these objectives. These range from taking care of our vulnerable customers, promoting skilled careers students, supporting economic growth, reducing crime and minimising our environmental impact.

Our Tyne & Wear zone stretches from Blyth in the north to Peterlee in the south. It covers the main cities of Newcastle, Sunderland and Durham. The zone serves 755,000 homes and business and includes our main offices at Shiremoor, Team Valley and Penshaw.

MEET THE TEAM

ANDY BILCLOUGH

Head of Tyne and Wear

Andy.Bilclough@northernpowergrid.com

“The subtle but effective changes we have made to our delivery model will improve our performance on a local level, meaning that we will improve the time it takes to restore power after a fault on our network.

Our priorities will be to make sure that our performance meets the needs and expectations of the people in Tyne & Wear and that key stakeholders have a local Northern Powergrid team that they can work with and rely on.”

ENGAGING WITH YOU

We want to work with you to understand how we can improve our services and support the communities of Tyne & Wear.

We set out to consult with you to make sure that we are delivering the service that you want.

As a member of the North East Chamber of Commerce, Our Head of Trading and Innovation, Jim Cardwell, chairs the Energy Group and partner meetings. This engagement is essential in making sure we are enabling the future growth and potential of our region.

Our stakeholder panel is a central part of our engagement process and is led by members of our board of directors. Members of the panel come from the public, private and voluntary sectors to represents a wide range of interests and expertise. If you are interested in taking part and helping to shape what we do in your community then get in touch with us at

yourpowergrid@northernpowergrid

Our stakeholder website

We have launched a website aimed at engaging with our stakeholders by communicating about our business improvements and our community enegagement achievements and plans.

We also use this website to promote our Stakeholder Report, which sets out how we performed through the first year of our business plan and describes how we've performed against our main commitments. We've tried to make it as easy as possible for those who aren't familiar with our business to understand how we've done in this last year. Visit at:

www.northernpowergrid.com/your-powergrid

Customer Liaison Officer

If you have any queries or concerns that you would like to discuss with us you can get in touch with our dedicated Tyne & Wear Customer Liaison Officer by emailing team@northernpowergrid.com

Get in touch

If you would like to talk to us about who we are, what we do and how we can work with you, get in touch with our stakeholder engagement team at

RAPID RES

INVESTING IN TYNE & WEAR

We are investing £75 million in Tyne & Wear throughout our business plan period of 2015-2023.

Our work focuses on the replacement of assets, underground cables and overhead lines. We are also investing in flood defences and reinforcing the network to ensure that we deliver the best possible service in your area.

On the map we have highlighted our biggest investment schemes in Tyne & Wear. For more information you can visit our investment map at northernpowergrid.com/investments-in-your-area

Our long-term investments are vital to the successful distribution of electricity in your area. Therefore, we think it's important to continue to consult and work with local authorities and other key stakeholders to ensure that we consider your issues and priorities throughout our investment schemes.

WALKER

Condition data suggests that the equipment located at this site is in need of work. From 2017 we will invest £2.41 million over two years to replace our assets.

POTTERHOUSE

We are carrying out a £3.18 million programme of works to ensure the ongoing quality and security of supply to the area. The works will also allow the network to cope with future demand. Our work began in 2016 and will take two years to complete.

HAWTHORN PIT

From 2021 to 2022 we're investing £1.9 million to replace eleven circuit breakers, which are nearing the end of their useful life.

PONTELAND

In 2016 we have started work to install 7.5km of underground cable. Our £1 million investment will ensure a more reliable supply for the local area.

BIRTLEY GROVE

In 2020 we will start work to replace seventeen circuit breakers. We will invest £1.74 million over three years to improve our supply.

PROVIDING GREAT CUSTOMER SERVICE

We want you to feel like we deliver the high quality customer care you expect and deserve every time you contact us. Through our customer service improvement programme we are keeping your needs at the forefront of how we do business.

Our Penshaw based customer contact centre is open 24-hours a day, every day, with a team of professional advisors who are ready to respond to the needs of our customers across our nine operating zones.

With text services, social media and online services, face-to-face, telephone and e-mail, you can choose how you want to engage with us.

By going out into the community with our customer support vehicles, sending proactive communications to share details of our investment schemes and creating opportunities for people to have their say, we continue to improve the day-to-day customer experience.

OUR DIGITAL SERVICE

We are continuously working to deliver high quality customer service. We've seen a huge growth in contact with our customers through digital channels and we've invested in significant improvements to this service.

Our online power cut checker and power cut reporting service lets our customers directly alert us if they're experiencing a power cut and see updates on when their power will be restored for both planned and unplanned power cuts. This allows our contact centre advisors more time to help customers who wish to contact us via the telephone.

We also text customers, where we have contact details, to keep them up to date on when we will restore their power.

To help local authorities and other public organisations manage the situation if there is a power cut, we have a system that allows them to access live information on power cuts and restoration times using a personalised login to an online map.

If you would like to have access then please get in touch with us at yourpowergrid@northernpowergrid and we'll set you up and guide you through our easy to use system.

CARING FOR OUR CUSTOMERS

Although we are always working to maintain our electricity network, sometimes power cuts do happen; therefore we have created online resources to make sure that you are prepared.

These resources include; home safety tips, videos on what to do in a power cut, our power cut reporting service and our power cut checker. Not only do we make sure these online resources are up to date and as useful as possible, we also go out into the community to help you with resilience planning.

We take part in regular meetings with the Northumbria and Durham Local Resilience Forums to support and contribute to their work in preparing the region for an emergency.

OUR PRIORITY SERVICES REGISTER

We understand that a power cut can be extremely inconvenient to our customers, but for some people it is so much more than that. In order for us to provide additional support to those who need it the most, we have a Priority Services Register.

Our customers can choose to register themselves, a family member or friend, if they feel they need extra support in a power cut.

We are always trying to find new ways to tailor the services we provide to customers' individual needs, as we understand that a one-size-fits-all approach is not appropriate for customers needing additional support.

Our contact centre will be able to offer additional information, advice and regular updates over the phone. We may be able to arrange for our partner, the British Red Cross, to provide emotional and practical support to you as needed.

We also have Customer Support Vehicles, which we send out during power cuts to provide refreshments, blankets and the chance to talk to one of our team face-to-face.

It's a priority for us to make sure that we know who needs this extra support and so we actively seek to promote our Priority Services Register. We work with care professionals and businesses to make sure that we are reaching our customers who need us the most.

If you work in Social Care, for the Health and Wellbeing Board or in other care professions, you can help us to promote our register, improve our service and help us to identify those who will benefit from being on our register. Please get in touch to help us to provide the best support for our customers.

FOR MORE INFORMATION ABOUT OUR PRIORITY SERVICES REGISTER

- ▶ Call us 24 hours a day on: **0800 169 2996**
- ▶ Email us at: priorityservices@northernpowergrid.com
- ▶ Visit our website at: northernpowergrid.com/priority

POWERING YOUR COMMUNITY

We invest in our communities by working with stakeholders to ensure that we use our local presence and resources to deliver a positive impact. We are committed to being an active member of the community and we strive to ensure that our investment has a sustainable benefit.

We sponsor local community projects in the area through our partnership with both the County Durham and Tyne & Wear and Northumberland Community Foundations. These projects are delivered in line with our guiding principles for community projects. Our Community Energy Seed Fund is also managed by the Tyne & Wear and Northumberland Community Foundation, ensuring that we're reaching the right groups and delivering the best service.

We also work with Newcastle Citizens Advice to support an advisor, who provides support to customers experiencing fuel poverty and who are in need of debt advice and energy saving guidance.

Our volunteering programme gives our employees the opportunity to support their local communities. Our volunteers attend events that we hold in partnership with the Trussell Trust and Ahead Partnership, where staff can support their local food banks and inspire school students to pursue careers in science, technology, engineering and maths subjects.

We are now in our second year of working with Ahead Partnership and in 2016 we are working together to 'Light up' Sunderland. The competition asks students to design their own Christmas light. It also encourages primary students to learn about energy efficiency, community and how to prepare for a power cut. The winners then get to have their light made and have a VIP event in Sunderland City Centre for the Christmas Lights switch on.

Through our schools safety programme we promote safety and raise awareness of the dangers surrounding electricity distribution to school students. Our Safety Advisors visit more than 25,000 school children every year and we have a fantastic interactive website that educates children through fun online resources. You can sign up to organise visits to local schools on our dedicated website:

thefusebox.northernpowergrid.com

OUR GUIDING PRINCIPLES HELP TO SHAPE OUR COMMUNITY PROJECTS AND PARTNERSHIPS:

- ▶ **Vulnerability to power cuts** – using our knowledge and local presence to help customers most vulnerable during power cuts
- ▶ **Energy affordability** – to help improve the homes and lives of our customers by providing far reaching and innovative solutions to energy affordability challenges
- ▶ **Strengthening communities** – to make a positive difference to the communities where we live and work
- ▶ **Public safety and education** – to develop skills and nurture talent to improve the lives of our communities through education and safety programmes and projects
- ▶ **Employee engagement** – to invest in our people and create a positive culture within our organisation and in the communities where we live and work.

GETTING CONNECTED

We are continuously improving our connections service without increasing cost; we're doing this by adapting our local operations and making better use of digital channels and technology to provide a personally tailored service.

► **New connections** – If you need a connection to a premise, our design team will work with you to provide a connection tailored to your requirements. We have a quick calculator at northernpowergrid.com/getconnected to get a more site specific guide to the price of your new connection. You'll also be able to apply for a formal estimate or quotation.

► **Changing connections** – If you are installing additional electrical equipment and need to increase the size of your electricity supply, we will help you understand the process of connecting this equipment to our network.

► **Supporting independent connections** – Customers can contract an Independent Connection Provider to provide and install certain aspects of their connection infrastructure. We actively promote this competition and if you want to get a quote from an alternative provider, we'll help you understand the process.

► **Supporting local generation schemes** – Supporting you throughout the planning stages of generating electricity from renewable and energy-efficient sources is a key part of what we do. We can help you to understand the connections process and provide you with a quotation that suits your project needs, whether it's small or large scale generation.

One of the first steps you can take in deciding whether you want to talk to us about a connection is by taking a look at our generation availability map; it provides an indication of our network's capability to connect large-scale developments to major substations and you can access this via our website: northernpowergrid.com/generation-availability-map

FOR GUIDE PRICES, TIMESCALES AND TO APPLY FOR YOUR CONNECTION

- ▶ Visit our website at: northernpowergrid.com/getconnected
- ▶ You can 'Ask the Expert' online and discuss your project and timescales with our technical specialists
- ▶ Alternatively call us Mon-Fri: 8am – 8pm or Sat: 9am – 5pm on: 0800 011 3433
- ▶ Write to us at: Northern Powergrid Network Connections, Alix House, Falcon Court, Stockton-on-Tees, TS18 3TU
- ▶ We host regular connections surgeries at our offices to offer expert advice and guidance on planning for connections projects. Visit northernpowergrid.com/customer-events-and-surgeries

FUTURE NETWORKS

Innovation is central to the way we do business every day. We look for new ways to improve the quality and range of services we provide to ensure that our network can meet current and future demands.

The decarbonisation agenda and technological progress present the electricity system with new challenges. In order to keep our knowhow and our services up to speed with the market evolution and with our customers' expectations, we invest in research projects.

We are particularly pleased to have led the Customer-Led Network Revolution project, one of the most significant smart grid projects ever undertaken in the UK. Learning from this project has enabled us to develop a smart grid route map for the future, and we are making changes to our business accordingly.

We also work to maximise the use of available capacity on our network to the benefit of our connections customers, and are involved in storage and demand side response trials.

Finally, we take part in consultations on transformational changes to the energy industry. We are happy to share our views and take suggestions and feedback from our stakeholders.

If you would like to learn more or discuss our low-carbon and innovation plans then get in touch with us at yourpowergrid@northernpowergrid.com

OUR INNOVATION STRATEGY FOCUSES ON FOUR OBJECTIVES:

- ▶ Maximise the value of smart meters
- ▶ Develop digital services
- ▶ Deploy smart grids
- ▶ Address affordability issues

SUPPORTING COMMUNITY ENERGY

Community energy projects rely on strong local roots, collective action, knowledge, and good leadership. Our Community Energy Seed Fund offers support to community energy groups in the early stages of their projects. The fund can help to provide initial support such as expert advice and feasibility studies.

The winner in our Tyne and Wear Zone this year is 'the great energy meet' by International Community Organisation of Sunderland for a series of energy related workshops, engaging traditionally hard-to-reach people.

We have also taken an active role in promoting Community Energy by supporting Community Energy England, hosting community energy events and through our Community Energy Connections Guide, which is available on our website at northernpowergrid.com/your-powergrid

CONTACT US

Our website

Access a range of services at northernpowergrid.com

Use our website to:

- ▶ pay an invoice
- ▶ request a new connection
- ▶ arrange a network diversion
- ▶ request a refund for a new connection
- ▶ find out about connecting distributed generation
- ▶ move your electricity service
- ▶ request a disconnection
- ▶ report a problem
- ▶ find your supplier
- ▶ find out about known power cuts in your area
- ▶ request the fitting of shrouding
- ▶ apply to be on our Priority Services Register.

Complaints

We acknowledge that sometimes, despite our best efforts, things can go wrong. The best way to register a complaint with us is through our online form, which is available at: northernpowergrid.com/complaints

Call us 24 hours a day on:
0800 781 8848

Write to us at:
